

Md Abdullah Al Noman

Software Engineer | Backend & Cloud

Kassel, Germany

abdullahnoman.5945@gmail.com | +4915215624625 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Profile Summary

Backend Software Engineer with professional experience building and maintaining cloud-native backend systems in a Japanese startup environment. Experienced in Node.js, TypeScript, REST APIs, PostgreSQL, AWS Lambda, Amazon RDS, AWS CDK, Terraform, and CI/CD. Currently pursuing an M.Sc. in Computer Science at Universität Kassel and seeking a working-student or junior Software Engineering role in backend or cloud development.

Work Experience

Software Engineer (Backend)

Mar 2025 – May 2026

FIT Inc, Tokyo, Japan

- **Architected and developed the complete backend system** for a production application, including **72 REST APIs**, cloud infrastructure, database architecture, and deployment pipelines.
- Designed and implemented backend services using **Node.js**, **TypeScript**, and **AWS Lambda**, with a focus on maintainable and modular architecture.
- Refactored and consolidated Lambda functions to reduce unnecessary function fragmentation and improve backend maintainability; the consolidation also **partially mitigated cold-start overhead**.
- Restructured the backend using **Dependency Injection**, **Repository Pattern**, and domain-oriented modular design, following principles of **Domain-Driven Design (DDD)** and Clean Architecture.
- Designed the **AWS cloud infrastructure**, including **VPC networking**, Lambda deployment, and supporting services for the production backend.
- Designed and managed **PostgreSQL** database architecture on **Amazon RDS**, using **RDS Proxy** to efficiently manage database connections from serverless workloads.
- Designed and implemented **Infrastructure as Code** using **AWS CDK** and **Terraform**, and established **CI/CD pipelines** for automated testing and deployment.
- Contributed to a parallel **Azure-based serverless project** using **Azure Functions**, Python, and Azure Blob Storage.

Technical Skills

- **Languages:** TypeScript, JavaScript, Python
- **Backend:** Node.js, NestJS, Express.js, FastAPI, REST API Design
- **Databases:** PostgreSQL, MongoDB, DynamoDB
- **Cloud:** AWS (Lambda, RDS, S3), Azure (Functions, Blob Storage)
- **Infrastructure:** AWS CDK, Terraform, VPC
- **DevOps:** CI/CD, Git
- **Architecture:** Clean Architecture, Domain-Driven Design, Dependency Injection, Repository Pattern, Database Modeling
- **Frontend:** React, Next.js, Tailwind CSS

Education

M.Sc. in Computer Science

Universität Kassel, Kassel, Germany

2026 – Present

B.Sc. in Computer Science and Engineering

Ahsanullah University of Science and Technology, Dhaka, Bangladesh

2019 – 2023

Projects

Openset Job Seeker

Recruitment platform connecting Japanese companies with overseas workers

2025 – 2026

- **Role:** Backend Engineer (with frontend integration)
- **Responsibilities:**
 - Designed and developed RESTful backend services using **Node.js**, **TypeScript**, and **AWS Lambda**.
 - Designed PostgreSQL database schemas and ER diagrams for job search, applications, and interview management.
 - Implemented business logic for job search, application tracking, and interview workflows.
 - Integrated the **Next.js** frontend with backend REST APIs.
 - Supported cloud deployment and infrastructure configuration using **AWS CDK**.
- **Technologies:** Node.js, TypeScript, PostgreSQL, AWS Lambda, Next.js, AWS CDK

Levis Car Services

Web application for online car service selection, booking, and payment

2024

- **Role:** Backend and Frontend Development
- **Responsibilities:**
 - Designed and developed RESTful backend services using **Node.js** and **Express.js**.
 - Designed database schemas and ER diagrams and managed **MongoDB** data models.
 - Implemented business logic for service discovery, **time-slot-based booking**, and booking tracking.
 - Integrated the **React.js** frontend with backend REST APIs.
 - Integrated **Stripe** for secure online card payments.
- **Technologies:** Node.js, TypeScript, Express.js, MongoDB, React.js, Stripe
